PROFESSIONAL SUMMARY

Graduating Informatics Engineering student (Software Engineering, Homs University) with hands-on experience building production interfaces at a tech startup and across 5+ projects. Proficient in React, Next.js, TypeScript, and Redux Toolkit. Delivered multi-role platforms with role-based access control, multilingual support, and responsive design — including a landing page for a university tech incubator and a dashboard for a daycare platform. Focused on clean, maintainable code and user-centered experiences.

TECHNICAL SKILLS

Languages & Core: HTML, CSS, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Next.js, Redux Toolkit, Bootstrap, Material UI (MUI), Tailwind CSS, Framer Motion

Concepts: Responsive Design, REST APIs, WebSocket, Component-Based Architecture, Axios, Mobile-First Design, Accessibility, i18n

Tools & Deployment: Git, GitHub, GitLab, Vite, npm, Vercel, Figma, React Developer Tools

UX & Design: User-Centered Design, Wireframing, Prototyping, Basic UX Research

EXPERIENCE

Front-End Developer Intern | Asinnah Startup, Syria

Oct 2025 – Present

- Build production interfaces using React, Next.js, TypeScript, Tailwind CSS, and Framer Motion; collaborate with team via GitLab for version control and code reviews.
- Contributed to 3 real-world client projects: a daycare management dashboard, a landing page for Al-Birr (charitable association, Homs), and a landing page for the IT & Telecommunications Incubator at University of Homs.
- Integrate external APIs using Axios; use AI-assisted tools (Cursor AI, Claude AI, Plane) to streamline development workflows.

Full-Stack Web Dev Trainee | Vika Next.js Program

Jun 2025 – Oct 2025

- Completed intensive training covering TypeScript, Advanced React, Redux Toolkit, and Next.js; built scalable hands-on projects.

UX Design Trainee | Women in Tech – Paper Airplane Program

Feb 2025 – May 2025

- Completed UX program covering user research, wireframing, prototyping, and UI principles; earned certificate.

Front-End Development Trainee | Vica (Online)

Nov 2024 – Feb 2025

- 4-month intensive training in JavaScript, GitHub, Tailwind CSS, and React; built interactive UI projects.

Front-End Developer Trainee | Darebni, Homs

Oct 2023 – Apr 2024

- In-person training in HTML, CSS, JavaScript, Bootstrap, GitHub, and React; earned certificate.

PROJECTS

Donation Management System | Graduation Project – In Progress

Technologies: React, JavaScript, Redux Toolkit, Mui, i18n, Laravel, React Native

- Team project building a platform to organize and monitor donation campaigns in Syria, improving transparency and reducing fraud.
- Responsible for the responsive public website and admin dashboard with multilingual support and clear user flows.

ArchLink | Academic Team Project – Completed

Technologies: React.js, React Router, Context API, i18next, Axios, Laravel 11, MySQL, Laravel Sanctum

- Built 5+ views and 2 full dashboards (company & admin) for a platform connecting architecture designers with clients; implemented role-based access control for 3 user roles (visitor, client, architect).
- Handled protected routes, multilingual support (i18n), product filtering with search, blog features, and asset downloads; frontend connected to a fully functional local REST API (json-server) with complete CRUD operations — user auth, data creation, deletion, and filtering all operational; live on Vercel.

EduPress – Educational Platform | *Academic Project – Completed*

Technologies: *Next.js, React, TypeScript, Redux Toolkit, Bootstrap*

- Developed front-end for an educational platform displaying 20 courses with paginated views (6 per page) using 2 Redux slices for state management.
- Implemented user authentication, loading/error states, and modular components; deployed on Vercel with mock API integration.

Online Store – E-Commerce App | *Personal Project – In Progress*

Technologies: *Next.js, Redux Toolkit, Bootstrap, React, Axios*

- Building 8–9 page e-commerce app with product filtering by price, category, and brand; search by name and brand; cart with Local Storage persistence; and dark/light mode toggle.
- Implementing user authentication, responsive design, loading states, and modular components; fetches product data from a public API.

EDUCATION

B.Sc. Informatics Engineering – Software Engineering | University of Homs, Syria

Expected 2026

Relevant Coursework: Web Development, UX/UI Design, Software Engineering Principles

LANGUAGES

Arabic: Native

English: B1

Turkish: Conversational
